Joram

Data Annotation & Transcription Specialist

Kenya | [your email] | [your phone / WhatsApp] | github.com/joram-afk

ABOUT ME

I label, transcribe and review data for a living, and I'm careful about it. I follow style guides to the letter, I notice when an instruction is unclear instead of guessing, and I'm happy to retake a test when it shows me where I'm weak. I also write code, so I understand why clean, consistent labels matter once they reach a model.

EXPERIENCE

Freelance Transcription & Annotation Contributor

Oneforma | Remote

- Transcribe audio to text following verbatim conventions, including how to handle false starts, fillers and unclear speech.
- Apply tagging rules for non-speech sounds, speaker changes and unintelligible segments, keeping to the required pipeline order.
- Passed the platform's transcription certification exam on verbatim rules, tagging and workflow.

Freelance Task & Knowledge Contributor

TalaTask | Remote

- Complete task-based assignments and subject-knowledge interviews, including sports rules topics such as rugby.
- Use interview feedback to find gaps in my knowledge, study them, and come back for a retake.
- Work independently to deadlines, reading guidelines closely and checking my work before I submit.

PROJECT

Joe Cash - Fintech app for Kenyan users (solo build)

- Designed and built the full app: Node.js/Express backend, MongoDB database and a single-page frontend.
- Integrated M-Pesa STK push payments through Safaricom's Daraja API (currently on sandbox) with JWT authentication and Google sign-in.
- Built a separate admin dashboard for managing customers and sending bulk emails; deployed both apps on Vercel.
- Debugged real production issues myself, from database index errors to deployment access settings.

SKILLS

Annotation: audio transcription, verbatim and tagged transcripts, guideline-based labelling, quality self-review, spotting ambiguous cases
Technical: JavaScript, Node.js, Express, MongoDB, REST APIs, Git/GitHub, Vercel
Working style: detail-focused, self-managed, quick to learn new platforms and style guides, reliable with deadlines
Tools: remote work platforms, Google Workspace, Gmail, M-Pesa Daraja

EDUCATION & CERTIFICATIONS

- Oneforma Transcription Certification (verbatim conventions, tagging rules, pipeline order)
- [Add your school / course and year]
